

Sales Hub: See the Pipeline You Actually Have

Sales Hub turns the sales data you're already collecting into a ranked list of the deals worth chasing today.

Know Where Every Deal Stands, Right Now

Sales Hub provides real-time pipeline health, conversion trends, and stalled deals directly in SA5, filterable by company, region, market, branch, or rep without manual views.

Stop Managing Spreadsheets, Start Closing Deals

Your sales data is in SA5, but building daily spreadsheets to track pipeline status is slow, error-prone, and distracting.

What Sales Hub Does

- 🔍 **See your whole pipeline at once.** Your funnel by company, region, market, or branch, in real time. Volume or dollars, already organized.
- 💬 **Get the real conversion story.** Bad-fit leads you turned down don't count against your win rate, so what you're looking at is actual sales performance, not noise.
- 📋 **Chase the right deals.** A prioritized list of the quotes sitting too long, with links straight back into RealGreen so the follow-up happens where the work happens.
- 🛡️ **Protect your margins.** See how each rep discounts. Spot who's selling value and who's buying business, then coach it.
- 🔍 **Find your revenue leak.** Slow response and missed follow-up lose deals quietly. Sales Hub shows who's sitting on the stalled ones.

Sales Hub is a part of Decision Intelligence, live inside SA5 using the role-based security you already have in place.
